

Acadia National Park Vegetation Map Class for Alder Shrubland

The map class "[Alder Shrubland](#)" is composed of the following vegetation associations, each described separately:

- [Alluvial Alder Thicket](#)
- [Northern Peatland Shrub Swamp](#)

The Alder Shrubland map class (ASP) is an alder dominated shrubland. The alder canopy can be completely closed (100%) to somewhat open (60%). When open, graminoid vegetation can usually be seen amongst the shrubs.
